PROFESSIONAL SUMMARY

AI Automation Specialist and Backend Engineer with hands-on experience in building end-to-end automation systems, AI-powered dashboards, and scalable workflows. Skilled in LLM integration, agent development, and business process automation, with a strong foundation in cybersecurity and system design. Proven ability to reduce manual operations by 80%+ and create centralized systems that enhance decision-making and operational efficiency.

EXPERIENCE

AI Automation Specialist

Maalibu Sphere Pvt. Ltd. | Sep 2025 – Present

- Automated end-to-end business operations using 100+ workflows across n8n, Make, and GoHighLevel
- Built and managed centralized systems integrating CRM, calling platforms, Slack, and internal tools
- Developed a custom Slack Dialer App for real-time lead assignment and agent coordination
- Designed multi-department dashboards for Call Center, Marketing, Sales, and Fulfillment tracking
- Engineered a fully automated client onboarding system enabling instant access provisioning
- Integrated cross-platform APIs to create a unified operational pipeline with minimal manual intervention
- Improved productivity by 80%+ by eliminating repetitive workflows and manual processes
- Built an AI-powered Executive Dashboard enabling CEOs and Product Managers to monitor teams, track KPIs, and gain actionable insights, centralizing complete company operations into a single intelligent interface
- Built and deployed multiple AI agents and custom skills integrated directly into Slack, enabling team members to execute complex workflows, generate reports, and complete operational tasks through natural conversation during planning and daily work
- Architected and designed the complete AI agent infrastructure for Maalibu, including multi-agent delegation workflows using Claude Code and Hermes Agent SDK
- Implemented agent delegation patterns where Claude orchestrates task routing and Hermes handles autonomous execution, enabling end-to-end process automation with minimal human intervention

Freelancer (AI Automation & Development)

Aug 2024 – Present

- Developed WhatsApp automation bots, lead scraping tools, and custom ERP systems
- Built business automation workflows using n8n, Gemini API, and Google Apps Script
- Designed and deployed web applications with Flask, Node.js, and Firebase
- Conducted security assessments and system hardening for client applications
- Delivered automation solutions reducing operational overhead for small businesses
- Built a Chrome extension for a visa consultancy (50-60 daily applications) that parses client PDFs and auto-fills multi-page government visa forms, cutting per-application time by 90%+

Customer Support Engineer

Prompt ERP Ltd. | Dec 2023 – July 2024

- Provided technical support and resolved ERP software issues for clients
- Worked with SQL databases, debugging, and backend troubleshooting
- Strengthened communication, issue diagnosis, and client-handling skills

PROJECTS

- **Visa Form Auto-Fill (Chrome Extension)**
 - Built a Chrome extension that parses PDF documents and auto-fills complex government visa application forms
 - Handles 50-60 daily applications with near-zero transcription errors
 - Stack: Chrome Extension APIs, JavaScript, PDF Parsing, DOM Manipulation
- **AI Executive Dashboard (Maalibu - Internal System)**
 - Built a centralized AI-powered dashboard for leadership decision-making
 - Integrated CRM, marketing, sales, and operations into a single platform
 - Enabled real-time insights, performance tracking, and automated reporting
- **Cold Email Generator (AI SaaS Tool)**
 - Developed a full-stack web app using Flask & Bootstrap
 - Integrated Google Gemini API for personalized email generation
 - Deployed on cloud (Render)
 - Link : emailpitchgenerator-bot.onrender.com
- **WhatsApp Bulk Messenger (Chrome Extension)**
 - Built automation tool using Selenium for bulk messaging
 - Implemented secure session handling and input validation
 - Link : github.com/jayeshkaithwas/WhatsApp-Web-Extension
- **NewsFlow**
 - Built AI-powered system to fetch, categorize, and summarize tech news
 - Integrated n8n workflows + LLM APIs for automated insights
 - Link : news-flow-liard.vercel.app/
- **Networking Python Toolkit**
 - Developed tools including TCP/UDP clients, proxy servers, packet sniffers
 - Focused on network protocols and packet-level analysis
 - Link : github.com/jayeshkaithwas/Networking-Python

TECHNICAL SKILLS

AI, Automation & LLM Engineering

- Prompt Engineering, Advanced Prompt Design
- LLM Integration (Gemini, OpenAI, Claude, Local LLMs - LLaMA, Gemma)
- AI Agents Development (multi-agent systems, tool-based workflows)
- RAG Pipelines & Knowledge Base Systems
- n8n, Make (Integromat), Workflow Automation
- Claude Code, Hermes Agent SDK, Multi-Agent Orchestration, Agent Delegation Architecture

Backend & Development

- Python, Node.js, Flask, PHP
- Firebase, REST APIs, Webhooks
- SQL, Database Design
- Chrome Extension Development

Integrations & Tools

- WhatsApp APIs (WAHA, Evolution API, GoGHL.ai)
- Google Apps Script, Google Sheets ERP/CRM
- GoHighLevel (CRM Automation)
- Browser Automation, PDF Parsing

Cloud & DevOps

- Docker, Linux Administration
- AWS (deployment basics)
- GitHub, CI/CD fundamentals

Cybersecurity & Networking

- VAPT: Burp Suite, Nmap, Nessus, Acunetix
- OWASP Top 10, Secure Coding
- TCP/IP, DNS, Packet Analysis
- Malware Analysis (Static & Dynamic)

EDUCATION

● Certified Software Programmer (CSP)

IANIT, Subhanpura | Sep 2023

- C, C++, Python, PHP, HTML, Secure Programming

● SSC (GSEB)

GSFC School, Vadodara | May 2020

- Percentage: 69.15%

CERTIFICATIONS

- Certified Ethical Hacker (CEH v12)
- Certified Appsec Practitioner (CAP)
- Certified Network Security Practitioner (CNSP)
- STAR Cyber Secure User - R 11
- Mastercard Cybersecurity Virtual Experience
- Tata Cybersecurity Security Analyst Job Simulation
